

GUNN

SECTIONAL BOOKCASES

THE GUNN FURNITURE COMPANY
GRAND RAPIDS, MICH. U.S.A.

"The Gunn System"

STYLES in house furnishings are continually changing. New periods are being exploited, and old furniture is continually making way for new. But though all the rooms in the house may be upset from time to time, the library is rarely disturbed.

This is true because the library remains the highest expression of the owner's artistic temperament. It is the one room in which are gathered the choicest collections of the world's greatest authors. It must be builded for the future as well as for present needs.

It is not enough that the room be well lighted, the wall paper restful, the easy chairs comfortable. The bookcases must harmonize. A single false note will destroy the ideal library.

The *Gunn Sectional Bookcase* is designed to meet every requirement of the book lover who wishes to house the wisdom of the centuries in fitting and permanent quarters. To the primary purpose of protection, the *Gunn* system of units has added artistic adornment and practical conveniences which make it adaptable to rooms of all dimensions. The book sections are of uniform depth and of three lengths and of three heights, with base and top to match. Your future needs are thus anticipated, and your present wants supplied.

They are made in all the popular woods and finishes. You may choose serviceable oak or mahogany and rest assured that it will be the best oak and the best mahogany, for the *Gunn* name carries with it the guarantee of quality, both in materials and workmanship.

This catalog shows the *Gunn Sectional Bookcase* in three styles, Standard, Clawfoot and Mission. These all are made in quartered oak, any finish desired. The Standard and Clawfoot patterns are also made in solid mahogany, with panelled, ends and in birch, mahogany finish.

There are several features about the *Gunn System* which differentiate it from being just a bookcase, and make it first and always the best sectional bookcase on the market.

There are no unsightly metal bands to mar the appearance of the *Gunn* cases. They do not resemble or suggest a stepladder with dust collecting ledges, but present a uniform front and preserve the symmetry of the room.

The door is easily removable without displacing the section above or tearing down the stack. Friction is eliminated by roller bearers and there is no possibility of it binding. Instead of unsightly metal bands, a plus shaped iron attached to the end of the shelf, and fitting grooves above and below in the end, binds the stack securely. Screws may be used if desired.

Apart from its artistic excellence, the *Gunn System* possesses the great merit of being easily adjusted. All the parts fit together perfectly, and the Desk Section, Four-Drawer Section, Music Section and Long Drawer Base Section are interchangeable, with door sections in plain or leaded glass. Any desired combination will fit together perfectly.

To meet the needs and requirements of the average library, long study has resulted in uniformity of measurements. *Gunn* cases may be had in three standard heights of book sections, the inside measurements being $9\frac{1}{4}$, $11\frac{1}{4}$ and $13\frac{1}{4}$ inches: three regular lengths, the three-quarter (26 in.), the standard ($34\frac{1}{4}$ in.) and large ($50\frac{3}{8}$ in.) measured over all; and one uniform depth, $10\frac{1}{2}$ inches, inside measurement.

A special unit is cataloged on page 20 for those requiring deeper sections.

Satisfied customers all over the world are using the *Gunn Sectional Bookcases*. We have thousands of agencies and every buyer can be sure of securing additional units whenever and wherever he desires. We are justly proud of the output of our factory and of the assurance with which we can promise to supply each customer with additional units to match his first order, no matter though he roams the wide world over.

Freight is prepaid to all points in the middle and eastern states, with liberal allowance to more distant points.

Total width, outside, $50\frac{3}{8}$ inches. $26\frac{3}{8}$ inches.
Total height, outside, $72\frac{3}{4}$ inches. $72\frac{3}{4}$ inches.

Furnished in Quartered Oak, any color. Birch (imitation mahogany) or solid mahogany to order if desired.

The inside measurement of the new large size units is 48 3/4 inches long; depth and height same as Standard Sections. Libraries comprising from 125 to 200 volumes are housed in a single stack of six large units. A single stack of Standard units will take not to exceed 120 volumes. Libraries beyond this number must necessarily start a second stack with the added cost of top and base.

Two stacks large units have the same capacity as three stacks Standard size units. Drawer Base with two drawers fitted horizontally may be had for large size Sections. A very convenient and useful Section. List Price, \$8.75.

This same ratio of saving is made on all libraries requiring more than one stack of Standard units. For Lawyers, Court Houses and School Libraries it is practically adapted. The shelves in our large units cannot sag as they are supported by the backs, and we guarantee them to give satisfaction in every detail.

If leaded glass is desired, add \$3.00 to list prices of each large book section, or \$2.00 to each three-quarter section.

For description of three-quarter sections see page 22.

For Grill Doors, add \$1.50 to list prices of each large section or \$1.00 for each three-quarter section.

Furnished in Quartered Oak, any color. Birch (imitation mahogany) or solid mahogany to order, if desired.

The new three-quarter size Sections are designed to take the place, more or less, of special size Sections, which heretofore have been furnished at an extra cost. These units, used with the Standard and large-size Sections in the "Gunn" System, eliminate much of the trouble and worry experienced in the past in fitting odd size wall spaces. (See page 31 showing diagrams and outside lengths.)

An original idea only to be had in the "Gunn" System. A stack and one-half in one, especially adapted for large libraries and law offices. This new large unit gives exactly 50 per cent. more shelf room in each unit for 33 1/3 per cent net advance in price. (See diagram, page 31.)
For Grill Doors, add \$1.50 to list prices of each large section or \$1.00 for each three-quarter section.

List Price, \$3.00

Our regular equipment for single unit Vertical File is a set of 40 alphabetical divisions and 40 folders printed in duplicate. Regular equipment for TWO UNIT USE is 80 subdivisions of the alphabet extending over three drawers, and one drawer arranged for numerical filing containing 20 guides and 200 folders. In the Numerical System each correspondent is given a number and the folder contains only his letters. This enables quick reference to your more important firms, general correspondence being filed in the alphabetical drawers.

Capacity of each Drawer File 2000 letters; of complete Two-Drawer Sections, 4000 letters.

Sectional Bookcases

Two Valuable Gunn Features

Give us the wall space you wish to fill, or number of volumes you desire to house, and we will send you list of units, tops and bases required and quote interesting prices.

Give us the wall space you wish to fill, or number of volumes you desire to house, and we will send you list of units, tops and bases required and quote interesting prices.

For List Prices of Three-Quarter and Large Units (see pages 20 and 21)

The accompanying diagrams will assist you to determine the various stacks (or tiers) to order to fill any given wall space. Our records show a very popular height for stacks to be five glass door sections; comprising one 13¼ in. high, two 11¼ in. and two 9¼ in. high, with top and base. The list prices given are based on each stack to contain the above units, made of selected Quartered White Oak, in any finish desired. Extreme height of stacks listed is 73 inches. (See pages 20 and 21.) Bear in mind all of these units are 10½ in. deep (inside measurement) and that your bookcase has, therefore, the handsome and uniform front appearance, doing away with the stepladder effect and dust-collecting ledges where units are stacked up comprising a variety of depths.

How to Order

We maintain agencies with reputable dealers in nearly every town.

If GUNN sectional units are not on sale in your town we will ship direct from the factory. When ordering direct, observe carefully the following:

Tops and bases are designated as top section and base section.

For books 9 inches high or less, order $9\frac{1}{4}$ in. book sections.

For books $9\frac{1}{4}$ to 11 inches high, order $11\frac{1}{4}$ in. book sections.

For books $11\frac{1}{4}$ to 13 inches high, order $13\frac{1}{4}$ in. book sections.

State plainly finish desired; if in oak, whether Golden, Weathered, Flemish, Fumed or other finish. Mahogany, whether light or dark to match other furniture. Birch, whether light or dark imitation Mahogany. (Send for samples.) If section is wanted to join on side of Ladies' Desk Section, order $13\frac{1}{4}$ inch book section, or on side of four-drawer section, $11\frac{1}{4}$ inch section. (See diagram of lengths, page 31.)

Special finish takes about 30 days to complete. See price list by sections on page 30.

Credit extended only to dealers.
